about Hi, I'm Daniel, a dedicated and enthusiastic 34-year-old front-end developer student from Gothenburg, eager to take my first steps in the tech industry. I'm a father of a young daughter and a slightly larger dog, and as a person, I'm social, curious, creative, and easygoing.

During my years, I've gained lots of experience working as a freelance consultant and in project form. I have been running my own company since 2013, recording and producing music for various independent projects and doing contract assignments for clients. I have also worked with DJ bookings at two venues in Gothenburg in recent years. As a former touring DJ and musician, I've become very comfortable with spoken and written English due to regular contact with various booking agencies and record labels. I am accurate and decent with numbers, as I did bookkeeping at my own company for many years and managed budgets and invoices as a DJ booker. I am hard-working, a great team worker, and always keen to learn and develop new skills.

And now, I am looking for an opportunity to start my new career as a front-end developer. I'd love to bring my dog to your office, but if that's not an option, I am flexible and sure we can work something out. I hope to hear from you soon.

work experience Web developer internship @ Lundgren + Lindqvist.
February 2023 - May 2023, Gothenburg, Sweden.
Front-end development. Mostly native JavaScript + HTML & CSS/Sass, but also some React.js and WordPress. Clients: Röda Sten, Berkley Nordic, Olsson Lyckefors, Slottsholmen.
